Everything You Need. Nothing You Don't.

Six powerful modules working together seamlessly

Call Analytics Dashboard

See every call at a glance. Track extensions, monitor answer rates, and spot trends over time with beautiful interactive charts.

- Multi-year call data storage
- Filter by date, extension, status & time-of-day
- Interactive drilldown reports
- AI-powered filtering
- CSV export of any data view

Cost Management

Know exactly what every call costs. Per provider, per extension, per day. No more bill shock — just clarity.

- Multiple telecom provider support
- Longest-prefix matching for accuracy
- Projected monthly spend
- Top cost drivers & flagged calls
- Peak/Off-Peak/Weekend breakdown

Business Phone Book

Your entire company directory in one place. Companies, contacts, departments — all searchable instantly.

- Company & contact management
- Alphabetical quick-jump navigation
- CSV import & export
- Automatic PBX phonebook sync
- Phone number enrichment

Unified Communications

Click-to-call, live presence, call transfer, WhatsApp messaging — your PBX and communications finally connected.

- Real-time extension presence
- Click-to-call from any contact
- Blind & attended call transfer
- WhatsApp Business API integration
- Virtual dial pad & keyboard

Calendar & Meetings

Book rooms, invite participants, set reminders. Conflict detection keeps double-bookings away.

- Room & resource booking
- Participant conflict detection
- Recurring meetings
- Notes & file attachments
- Email & WhatsApp reminders

User & Access Control

Give each team member exactly the access they need. Secure, role-based permissions per module.

- Admin & User roles
- Per-module permission control
- Secure session management
- Protected admin accounts
- Full audit capability

Feature Deep Dive

ANALYTICS & REPORTS

Why Teams Choose Vantix

Instant Setup

One installer, one click. Runs from your system tray. No servers, no cloud accounts, no IT department needed.

Your Data Stays Yours

Everything stored locally on your machine. No data leaves your network. Ever. Full cryptographic license security.

Auto Import

Drop your call records in a folder — Vantix picks them up automatically. Or pull CDR data directly from your PBX via API.

Beautiful Interface

Dark, modern, professional. Designed for all-day use without eye strain. Charts and data that look as good as they work.

PBX Connected

Integrates with Yeastar P-Series, S-Series & Cloud PBX for live presence, click-to-call, transfer, and contact sync.

Reports That Matter

Export-ready reports with real insights. Filter by anything. See exactly where your communication spend goes.

WhatsApp Built In

Send WhatsApp messages directly from the dashboard. Automated missed call & voicemail alerts to staff via WhatsApp.

Enterprise Security

Role-based access control, per-module permissions, secure sessions, and machine-bound licensing. Built for business.

Ready to Take Control?

Start your free 10-day trial today. Full features, no credit card, no obligations.
